Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of Group V (claims 25-36, 38 and 39 rewritten as claims 42-61) in the Paper of July 25, 2003 is acknowledged.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 42-44, 46, 47, 48 and 50-61 are rejected under 35 U.S.C. 102(e) as being anticipated by Kinast. Kinast teaches a system for detecting features of a sample having an optical probe (10) and an accessory device (20) where at least one of the probe and the accessory device includes an element for providing encoded information.

Art Unit: 2873

The microprocessor accepts input from the optical probe front-end (col. 4, lines 18-22).

Various types of instructional operations are included (col. 4, lines 23-31). As a pulseoximeter it would inherently include a flexible portion for conforming to a body space.

### ***Allowable Subject Matter***

Claims 45 and 49 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest that the system includes either a bar code for storing the encoded information or an RFID chip.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rafert and Quinn et al are cited to show other types of probes (optical is disclosed) that can include information processing.
